

generated January 2026

Anguilla

This report provides a series of summary charts, statistics and other details about the mobilization and use of open-access species data through the GBIF network, relating to users and participating institutions in Anguilla. These metrics show status at the time of report generation, unless otherwise noted. Taken together, the elements of this report can help guide and measure progress toward the information needs for biodiversity research, as well as for national commitments on biodiversity and sustainable development.

► Access and usage

► Data availability in Anguilla

► Data mobilization

Number of records published by institutions in Anguilla,
categorized by kingdom

Access and usage

Data downloads on GBIF.org from users in Anguilla

Monthly downloads requested by users in Anguilla

Data availability

Total data available for selected taxonomic groups in Anguilla

Mammals = Class *Mammalia*
Birds = Class *Aves*
Bony fish = Superclass
Osteichthyes p.p.
Amphibians = Class *Amphibia*

Insects = Class *Insecta*
Reptiles = Class *Testudines*,
Sphenodontia, *Squamata* &
Crocodylia
Molluscs = Phylum *Mollusca*

Arachnids = Class *Arachnida*
Flowering plants = Phylum
Magnoliophyta
Gymnosperms = Superclass
Gymnospermae

Ferns = Phylum *Pteridophyta*
Mosses = Phylum *Bryophyta*
Sac fungi = Phylum *Ascomycota*
Basidiomycota = Phylum
Basidiomycota

Change over time in records about biodiversity in Anguilla

WHY MIGHT THE AMOUNT OF MOBILIZED DATA DECREASE?

Datasets are sometimes removed by publishers, but more often decreases in the number of records are due to the removal of duplicate records and datasets.

SPECIES COUNTS represent the number of binomial scientific names for which GBIF has received data records, organized as far as possible using synonyms recorded in key databases like the Catalogue of Life

Newest publishers from Anguilla

No data available

Occurrence records downloaded from GBIF.org, published by institutions in Anguilla

See all publishers from this country or area
gbif.org/publisher/search?country=AI

Number of occurrence records downloaded via GBIF.org published by institutions in Anguilla

Data mobilization

Data sharing with country or area of origin by national institutions in Anguilla

Data sharing with country or area of origin

The chart above shows the number of records shared over time by publishers within Anguilla, with separate colours for records about species occurring within undefined and those occurring elsewhere.

Top data contributors about biodiversity in Anguilla

Rank	Country or area	No. of occurrences
1	United States of America	191,676
2	Anguilla	48,391
3	Belgium	1,054
4	Germany	737
5	France	637
6	United Kingdom	417
7	Netherlands	384
8	Sweden	321
9	Denmark	74
10	Switzerland	58

Table 1. Ranking of countries or areas contributing data about Anguilla

Top datasets contributing data about Anguilla

- University of Liverpool seabird tracking in Anguilla 2012-2015. *185,134 occurrences in Anguilla.* (Last updated 16 Dec 2025)
- EOD – eBird Observation Dataset. *48,391 occurrences in Anguilla.* (Last updated 29 Oct 2025)
- iNaturalist Research-grade Observations. *1,706 occurrences in Anguilla.* (Last updated 31 Dec 2025)
- NMNH Extant Specimen Records (USNM, US). *1,501 occurrences in Anguilla.* (Last updated 2 Jan 2026)
- PANGAEA - Data from Tübingen University. *993 occurrences in Anguilla.* (Last updated 17 Sep 2025)
