

generated January 2026

Saint Barthélemy

This report provides a series of summary charts, statistics and other details about the mobilization and use of open-access species data through the GBIF network, relating to users and participating institutions in Saint Barthélemy. These metrics show status at the time of report generation, unless otherwise noted. Taken together, the elements of this report can help guide and measure progress toward the information needs for biodiversity research, as well as for national commitments on biodiversity and sustainable development.

► Access and usage

► Data availability in Saint Barthélemy

► Data mobilization

Number of records published by institutions in Saint Barthélemy, categorized by kingdom

Access and usage

Data downloads on GBIF.org from users in Saint Barthélemy

Monthly downloads requested by users in Saint Barthélemy

Data availability

Total data available for selected taxonomic groups in Saint Barthélemy

Mammals = Class *Mammalia*
Birds = Class *Aves*
Bony fish = Superclass
Osteichthyes p.p.
Amphibians = Class *Amphibia*

Insects = Class *Insecta*
Reptiles = Class *Testudines*,
Sphenodontia, *Squamata* &
Crocodylia
Molluscs = Phylum *Mollusca*

Arachnids = Class *Arachnida*
Flowering plants = Phylum
Magnoliophyta
Gymnosperms = Superclass
Gymnospermae

Ferns = Phylum *Pteridophyta*
Mosses = Phylum *Bryophyta*
Sac fungi = Phylum *Ascomycota*
Basidiomycota = Phylum
Basidiomycota

Change over time in records about biodiversity in Saint Barthélemy

WHY MIGHT THE AMOUNT OF MOBILIZED DATA DECREASE?

Datasets are sometimes removed by publishers, but more often decreases in the number of records are due to the removal of duplicate records and datasets.

SPECIES COUNTS represent the number of binomial scientific names for which GBIF has received data records, organized as far as possible using synonyms recorded in key databases like the Catalogue of Life

Newest publishers from Saint Barthélemy

No data available

Occurrence records downloaded from GBIF.org, published by institutions in Saint Barthélemy

See all publishers from this country or area
gbif.org/publisher/search?country=BL

Number of occurrence records downloaded via GBIF.org published by institutions in Saint Barthélemy

Data mobilization

Data sharing with country or area of origin by national institutions in Saint Barthélemy

Data sharing with country or area of origin

The chart above shows the number of records shared over time by publishers within Saint Barthélemy, with separate colours for records about species occurring within undefined and those occurring elsewhere.

Top data contributors about biodiversity in Saint Barthélemy

Rank	Country or area	No. of occurrences
1	France	9,281
2	United States of America	7,441
3	Saint Barthélemy	3,924
4	Sweden	1,836
5	Netherlands	115
6	International organization or unknown country	81
7	United Kingdom	67
8	Australia	43
9	Poland	26
10	Finland	15

Table 1. Ranking of countries or areas contributing data about Saint Barthélemy

Top datasets contributing data about Saint Barthélemy

EOD – eBird Observation Dataset. 3,924 occurrences in Saint Barthélemy. (Last updated 29 Oct 2025)

Référentiel taxonomique national (TAXREF)-Inventaire des Collectivités d'outre-mer et de la métropole issu des données biogéographiques de TAXREF. 2,658 occurrences in Saint Barthélemy. (Last updated 20 Mar 2024)

Référentiel taxonomique national (TAXREF) - Inventaire des Collectivités d'outre-mer et de la métropole (ICOM_15) issu des données biogéographiques de TAXREF v15. 2,630 occurrences in Saint Barthélemy. (Last updated 17 Dec 2022)

Référentiel taxonomique national (TAXREF) - Inventaire des Collectivités d'outre-mer et de la métropole (ICOM_14) issu des données biogéographiques de TAXREF v14. 2,625 occurrences in Saint Barthélemy. (Last updated 15 Dec 2022)

University of Liverpool seabird tracking in Anguilla 2012-2015. 2,543 occurrences in Saint Barthélemy. (Last updated 16 Dec 2025)
