

generated January 2026

Central African Republic

This report provides a series of summary charts, statistics and other details about the mobilization and use of open-access species data through the GBIF network, relating to users and participating institutions in Central African Republic. These metrics show status at the time of report generation, unless otherwise noted. Taken together, the elements of this report can help guide and measure progress toward the information needs for biodiversity research, as well as for national commitments on biodiversity and sustainable development.

► Access and usage

► Data availability in Central African Republic

► Data mobilization

Number of records published by institutions in Central African Republic, categorized by kingdom

Access and usage

Data downloads on GBIF.org from users in Central African Republic

Monthly downloads requested by users in Central African Republic

Data availability

Total data available for selected taxonomic groups in Central African Republic

Mammals
14,556
occurrences

Birds
27,959
occurrences

Bony fish
4,864
occurrences

Amphibians
2,018
occurrences

Insects
34,407
occurrences

Reptiles
4,475
occurrences

Molluscs
258
occurrences

Arachnids
563
occurrences

Flowering plants
49,643
occurrences

Ferns
554
occurrences

Gymnosperms
56
occurrences

Mosses
1,187
occurrences

Sac fungi
117
occurrences

Basidiomycota
174
occurrences

Mammals = Class *Mammalia*
Birds = Class *Aves*
Bony fish = Superclass
Osteichthyes p.p.
Amphibians = Class *Amphibia*

Insects = Class *Insecta*
Reptiles = Class *Testudines*,
Sphenodontia, *Squamata* &
Crocodylia
Molluscs = Phylum *Mollusca*

Arachnids = Class *Arachnida*
Flowering plants = Phylum
Magnoliophyta
Gymnosperms = Superclass
Gymnospermae

Ferns = Phylum *Pteridophyta*
Mosses = Phylum *Bryophyta*
Sac fungi = Phylum *Ascomycota*
Basidiomycota = Phylum
Basidiomycota

Change over time in records about biodiversity in Central African Republic

Occurrence records available about species occurring in Central African Republic

Species for which at least one occurrence record is available in Central African Republic

WHY MIGHT THE AMOUNT OF MOBILIZED DATA DECREASE?

Datasets are sometimes removed by publishers, but more often decreases in the number of records are due to the removal of duplicate records and datasets.

SPECIES COUNTS represent the number of binomial scientific names for which GBIF has received data records, organized as far as possible using synonyms recorded in key databases like the Catalogue of Life

Newest publishers from Central African Republic

No data available

Occurrence records downloaded from GBIF.org, published by institutions in Central African Republic

See all publishers from this country or area
gbif.org/publisher/search?country=CF

Number of occurrence records downloaded via GBIF.org published by institutions in Central African Republic

Data mobilization

Data sharing with country or area of origin by national institutions in Central African Republic

Data sharing with country or area of origin

The chart above shows the number of records shared over time by publishers within Central African Republic, with separate colours for records about species occurring within undefined and those occurring elsewhere.

Top data contributors about biodiversity in Central African Republic

Rank	Country or area	No. of occurrences
1	United States of America	37,593
2	France	28,715
3	Central African Republic	14,161
4	Belgium	13,006
5	United Kingdom	10,933
6	South Africa	9,612
7	Estonia	8,820
8	International organization or unknown country	5,773
9	Netherlands	4,994
10	Japan	2,991

Table 1. Ranking of countries or areas contributing data about Central African Republic

Top datasets contributing data about Central African Republic

EOD – eBird Observation Dataset. *14,161 occurrences in Central African Republic.* (Last updated 29 Oct 2025)

Meise Botanic Garden Herbarium (BR). *11,350 occurrences in Central African Republic.* (Last updated 22 Jul 2025)

BirdMap Data - GPS tracking of Storks, Cranes and birds of prey, breeding in Northern and Eastern Europe. *8,527 occurrences in Central African Republic.* (Last updated 17 Dec 2025)

Tropicos MO Specimen Data. *8,411 occurrences in Central African Republic.* (Last updated 31 Dec 2025)

VectorBase (Bioinformatics Resource for Invertebrate Vectors of Human Pathogens). *7,981 occurrences in Central African Republic.* (Last updated 19 Mar 2024)
