

generated January 2026

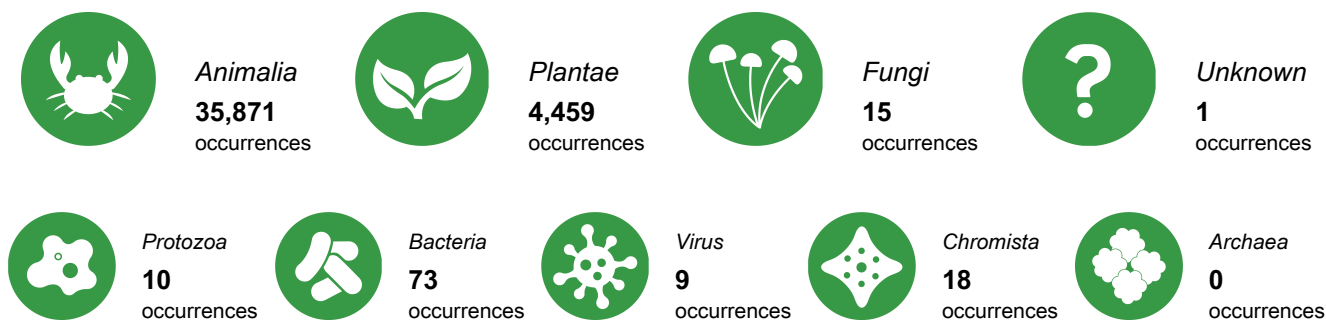

Djibouti

This report provides a series of summary charts, statistics and other details about the mobilization and use of open-access species data through the GBIF network, relating to users and participating institutions in Djibouti. These metrics show status at the time of report generation, unless otherwise noted. Taken together, the elements of this report can help guide and measure progress toward the information needs for biodiversity research, as well as for national commitments on biodiversity and sustainable development.

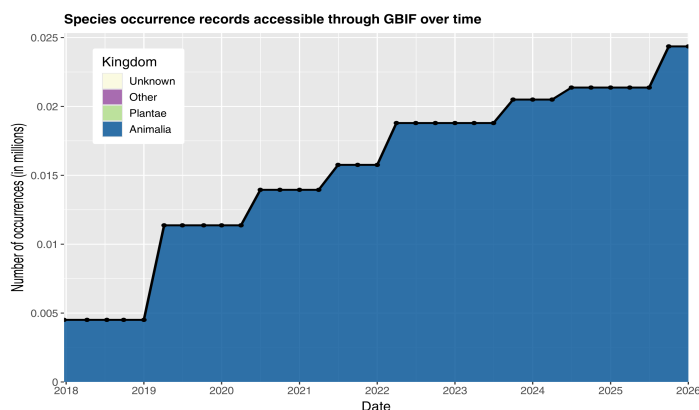

► Access and usage

► Data availability in Djibouti

► Data mobilization

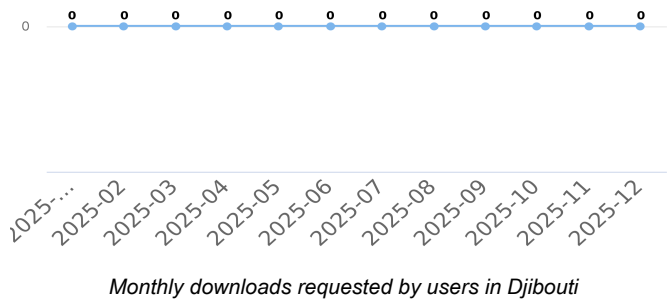

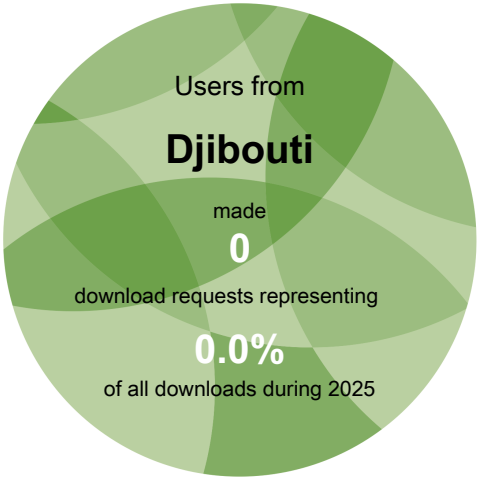

Number of records published by institutions in Djibouti,
categorized by kingdom

Access and usage

Data downloads on GBIF.org from users in Djibouti

Data availability

Total data available for selected taxonomic groups in Djibouti

Mammals
1,356
occurrences

Birds
27,490
occurrences

Bony fish
1,288
occurrences

Amphibians
303
occurrences

Insects
786
occurrences

Reptiles
1,452
occurrences

Molluscs
1,706
occurrences

Arachnids
28
occurrences

Flowering plants
4,318
occurrences

Ferns
29
occurrences

Gymnosperms
18
occurrences

Mosses
17
occurrences

Sac fungi
9
occurrences

Basidiomycota
6
occurrences

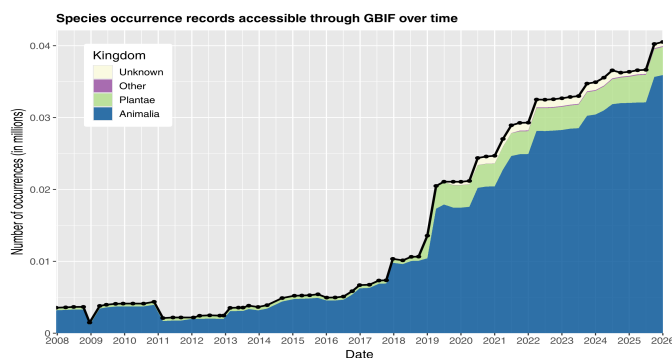

Mammals = Class *Mammalia*
Birds = Class *Aves*
Bony fish = Superclass
Osteichthyes p.p.
Amphibians = Class *Amphibia*

Insects = Class *Insecta*
Reptiles = Class *Testudines*,
Sphenodontia, *Squamata* &
Crocodylia
Molluscs = Phylum *Mollusca*

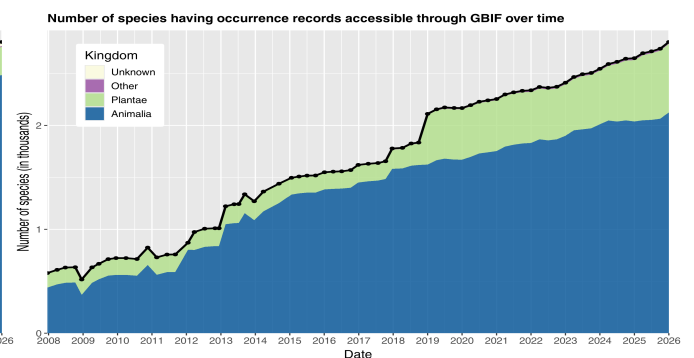

Arachnids = Class *Arachnida*
Flowering plants = Phylum
Magnoliophyta
Gymnosperms = Superclass
Gymnospermae

Ferns = Phylum *Pteridophyta*
Mosses = Phylum *Bryophyta*
Sac fungi = Phylum *Ascomycota*
Basidiomycota = Phylum
Basidiomycota

Change over time in records about biodiversity in Djibouti

Occurrence records available about species occurring in Djibouti

Species for which at least one occurrence record is available in Djibouti

WHY MIGHT THE AMOUNT OF MOBILIZED DATA DECREASE?

Datasets are sometimes removed by publishers, but more often decreases in the number of records are due to the removal of duplicate records and datasets.

SPECIES COUNTS represent the number of binomial scientific names for which GBIF has received data records, organized as far as possible using synonyms recorded in key databases like the Catalogue of Life

Newest publishers from Djibouti

No data available

Occurrence records downloaded from GBIF.org, published by institutions in Djibouti

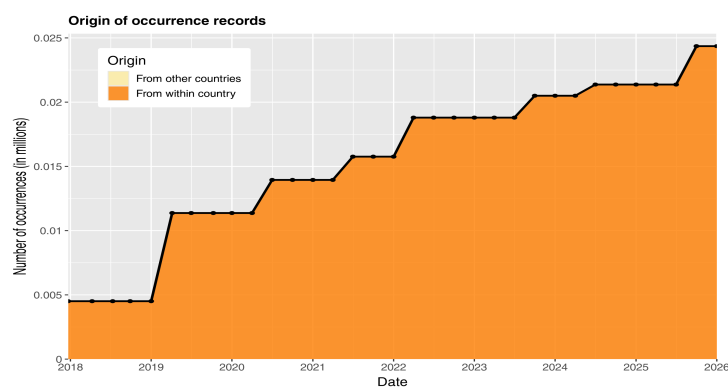

See all publishers from this country or area
gbif.org/publisher/search?country=DJ

Number of occurrence records downloaded via GBIF.org published by institutions in Djibouti

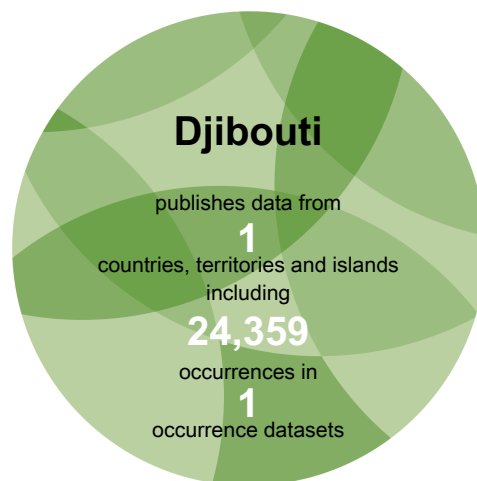

Data mobilization

Data sharing with country or area of origin by national institutions in Djibouti

Data sharing with country or area of origin

The chart above shows the number of records shared over time by publishers within Djibouti, with separate colours for records about species occurring within undefined and those occurring elsewhere.

Top data contributors about biodiversity in Djibouti

Rank	Country or area	No. of occurrences
1	Djibouti	24,359
2	United States of America	6,913
3	France	5,517
4	United Kingdom	1,401
5	Netherlands	702
6	International organization or unknown country	587
7	Belgium	333
8	Germany	255
9	Switzerland	82
10	Australia	53

Table 1. Ranking of countries or areas contributing data about Djibouti

Top datasets contributing data about Djibouti

EOD – eBird Observation Dataset. 24,359 occurrences in Djibouti. (Last updated 29 Oct 2025)

FLOTROP, a massive contribution to plant diversity data for open ecosystems in Tropical Africa.. 2,992 occurrences in Djibouti. (Last updated 28 Aug 2019)

NMNH Material Samples (USNM). 2,407 occurrences in Djibouti. (Last updated 1 Jan 2026)

NMNH Extant Specimen Records (USNM, US). 1,498 occurrences in Djibouti. (Last updated 2 Jan 2026)

iNaturalist Research-grade Observations. 876 occurrences in Djibouti. (Last updated 31 Dec 2025)
