

generated January 2026

Gambia

This report provides a series of summary charts, statistics and other details about the mobilization and use of open-access species data through the GBIF network, relating to users and participating institutions in Gambia. These metrics show status at the time of report generation, unless otherwise noted. Taken together, the elements of this report can help guide and measure progress toward the information needs for biodiversity research, as well as for national commitments on biodiversity and sustainable development.

► Access and usage

► Data availability in Gambia

► Data mobilization

Number of records published by institutions in Gambia, categorized by kingdom

Access and usage

Data downloads on GBIF.org from users in Gambia

Recent peer-reviewed articles using GBIF-mediated data by co-authors based in Gambia

The GBIF Secretariat maintains and reports on an ongoing literature tracking programme, giving priority to substantive uses of GBIF-mediated data in peer-reviewed literature while identifying the countries or areas of the authors' institutional affiliations. The citations below represent the five most recent journal articles with at least one co-author from Gambia.

Those interested in assisting the Secretariat in identifying additional peer-reviewed uses of GBIF-mediated data may forward relevant citations to comms@gbif.org.

Martín, Erinjery, Ediriweera *et al.* (2024) Effects of global change on snakebite envenoming incidence up to 2050: a modelling assessment. *The Lancet Planetary Health*.

Data availability

Total data available for selected taxonomic groups in Gambia

Mammals
4,321
occurrences

Birds
819,439
occurrences

Bony fish
6,979
occurrences

Amphibians
469
occurrences

Insects
24,182
occurrences

Reptiles
2,276
occurrences

Molluscs
1,563
occurrences

Arachnids
271
occurrences

Flowering plants
9,745
occurrences

Ferns
45
occurrences

Gymnosperms
1
occurrences

Mosses
747
occurrences

Sac fungi
296
occurrences

Basidiomycota
101
occurrences

Mammals = Class *Mammalia*
Birds = Class *Aves*
Bony fish = Superclass
Osteichthyes p.p.
Amphibians = Class *Amphibia*

Insects = Class *Insecta*
Reptiles = Class *Testudines*,
Sphenodontia, *Squamata* &
Crocodylia
Molluscs = Phylum *Mollusca*

Arachnids = Class *Arachnida*
Flowering plants = Phylum
Magnoliophyta
Gymnosperms = Superclass
Gymnospermae

Ferns = Phylum *Pteridophyta*
Mosses = Phylum *Bryophyta*
Sac fungi = Phylum *Ascomycota*
Basidiomycota = Phylum
Basidiomycota

Change over time in records about biodiversity in Gambia

Occurrence records available about species occurring in Gambia

Species for which at least one occurrence record is available in Gambia

WHY MIGHT THE AMOUNT OF MOBILIZED DATA DECREASE?

Datasets are sometimes removed by publishers, but more often decreases in the number of records are due to the removal of duplicate records and datasets.

SPECIES COUNTS represent the number of binomial scientific names for which GBIF has received data records, organized as far as possible using synonyms recorded in key databases like the Catalogue of Life

Newest publishers from Gambia

No data available

Occurrence records downloaded from GBIF.org, published by institutions in Gambia

gbif.org/publisher/search?country=GM

Number of occurrence records downloaded via GBIF.org published by institutions in Gambia

Data mobilization

Data sharing with country or area of origin by national institutions in Gambia

Data sharing with country or area of origin

The chart above shows the number of records shared over time by publishers within Gambia, with separate colours for records about species occurring within undefined and those occurring elsewhere.

Top data contributors about biodiversity in Gambia

Rank	Country or area	No. of occurrences
1	Gambia	545,128
2	Netherlands	249,463
3	United States of America	30,698
4	Germany	11,743
5	United Kingdom	10,200
6	Sweden	8,464
7	France	5,437
8	Finland	4,513
9	Colombia	1,752
10	Belgium	1,659
