

generated January 2026

Guam

This report provides a series of summary charts, statistics and other details about the mobilization and use of open-access species data through the GBIF network, relating to users and participating institutions in Guam. These metrics show status at the time of report generation, unless otherwise noted. Taken together, the elements of this report can help guide and measure progress toward the information needs for biodiversity research, as well as for national commitments on biodiversity and sustainable development.

► Access and usage

► Data availability in Guam

► Data mobilization

Number of records published by institutions in Guam,
categorized by kingdom

Access and usage

Data downloads on GBIF.org from users in Guam

Recent peer-reviewed articles using GBIF-mediated data by co-authors based in Guam

The GBIF Secretariat maintains and reports on an ongoing literature tracking programme, giving priority to substantive uses of GBIF-mediated data in peer-reviewed literature while identifying the countries or areas of the authors' institutional affiliations. The citations below represent the five most recent journal articles with at least one co-author from Guam.

Those interested in assisting the Secretariat in identifying additional peer-reviewed uses of GBIF-mediated data may forward relevant citations to comms@gbif.org.

McKenzie, Yoshida, Aini *et al.* (2021) Seagrass ecosystems of the Pacific Island Countries and Territories: A global bright spot. *Marine Pollution Bulletin*.

Data availability

Total data available for selected taxonomic groups in Guam

Mammals
952
occurrences

Birds
19,080
occurrences

Bony fish
55,290
occurrences

Amphibians
807
occurrences

Insects
24,435
occurrences

Reptiles
8,173
occurrences

Molluscs
16,010
occurrences

Arachnids
1,215
occurrences

Flowering plants
12,610
occurrences

Ferns
1,695
occurrences

Gymnosperms
135
occurrences

Mosses
800
occurrences

Sac fungi
494
occurrences

Basidiomycota
332
occurrences

Mammals = Class *Mammalia*
Birds = Class *Aves*
Bony fish = Superclass
Osteichthyes p.p.
Amphibians = Class *Amphibia*

Insects = Class *Insecta*
Reptiles = Class *Testudines*,
Sphenodontia, *Squamata* &
Crocodylia
Molluscs = Phylum *Mollusca*

Arachnids = Class *Arachnida*
Flowering plants = Phylum
Magnoliophyta
Gymnosperms = Superclass
Gymnospermae

Ferns = Phylum *Pteridophyta*
Mosses = Phylum *Bryophyta*
Sac fungi = Phylum *Ascomycota*
Basidiomycota = Phylum
Basidiomycota

Change over time in records about biodiversity in Guam

Occurrence records available about species occurring in Guam

Species for which at least one occurrence record is available in Guam

WHY MIGHT THE AMOUNT OF MOBILIZED DATA DECREASE?

Datasets are sometimes removed by publishers, but more often decreases in the number of records are due to the removal of duplicate records and datasets.

SPECIES COUNTS represent the number of binomial scientific names for which GBIF has received data records, organized as far as possible using synonyms recorded in key databases like the Catalogue of Life

Newest publishers from Guam

No data available

Occurrence records downloaded from GBIF.org, published by institutions in Guam

See all publishers from this country or area
gbif.org/publisher/search?country=GU

Number of occurrence records downloaded via GBIF.org published by institutions in Guam

Data mobilization

Data sharing with country or area of origin by national institutions in Guam

Data sharing with country or area of origin

The chart above shows the number of records shared over time by publishers within Guam, with separate colours for records about species occurring within undefined and those occurring elsewhere.

Top data contributors about biodiversity in Guam

Rank	Country or area	No. of occurrences
1	United States of America	133,737
2	United Kingdom	28,477
3	Guam	18,382
4	Switzerland	1,475
5	Australia	1,398
6	Netherlands	1,280
7	Japan	1,063
8	International organization or unknown country	978
9	France	527
10	Sweden	407

Table 1. Ranking of countries or areas contributing data about Guam

Top datasets contributing data about Guam

NOAA Pacific Islands Fisheries Science Center, Ecosystem Sciences Division, National Coral Reef Monitoring Program: Stratified random surveys (StRS) of reef fish in the U.S. Pacific Islands. *40,308 occurrences in Guam.* (Last updated 2 Nov 2022)

Mariana and Kermadec Trench sediment 16S rRNA gene sequencing. *24,218 occurrences in Guam.* (Last updated 23 Sep 2025)

NMNH Extant Specimen Records (USNM, US). *20,536 occurrences in Guam.* (Last updated 2 Jan 2026)

University of Guam Insect Collection. *18,610 occurrences in Guam.* (Last updated 19 May 2023)

EOD – eBird Observation Dataset. *18,382 occurrences in Guam.* (Last updated 29 Oct 2025)
