

generated January 2026

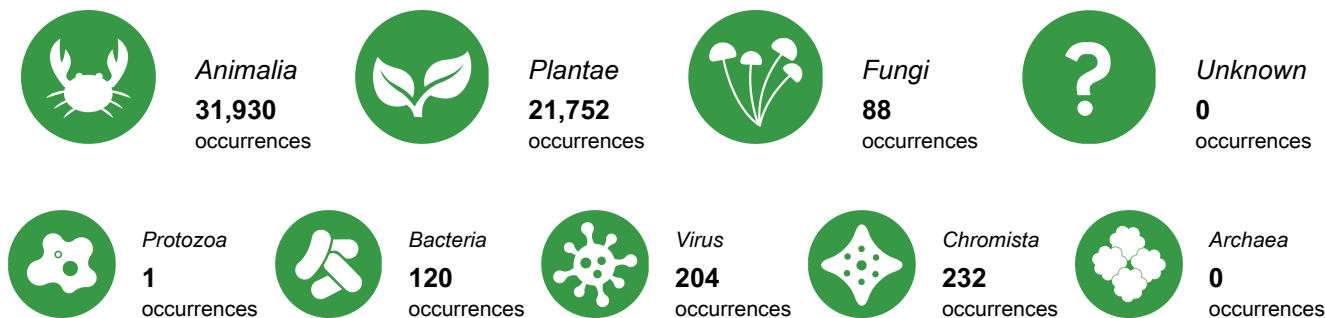

Comoros

This report provides a series of summary charts, statistics and other details about the mobilization and use of open-access species data through the GBIF network, relating to users and participating institutions in Comoros. These metrics show status at the time of report generation, unless otherwise noted. Taken together, the elements of this report can help guide and measure progress toward the information needs for biodiversity research, as well as for national commitments on biodiversity and sustainable development.

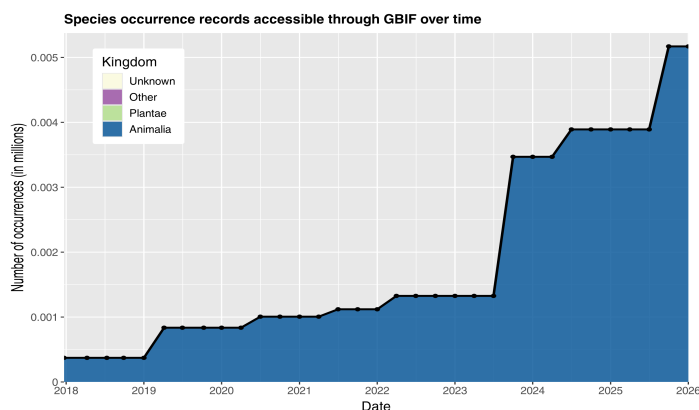

► Access and usage

► Data availability in Comoros

► Data mobilization

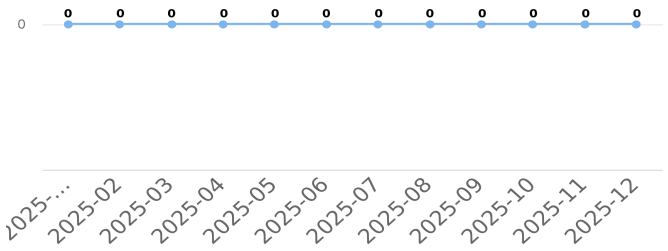

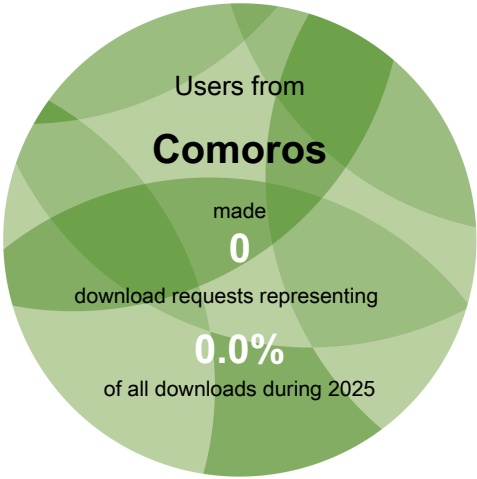

Number of records published by institutions in
Comoros, categorized by kingdom

Access and usage

Data downloads on GBIF.org from users in Comoros

Monthly downloads requested by users in Comoros

Data availability

Total data available for selected taxonomic groups in Comoros

Mammals
1,218
occurrences

Birds
7,518
occurrences

Bony fish
7,860
occurrences

Amphibians
4
occurrences

Insects
7,278
occurrences

Reptiles
1,240
occurrences

Molluscs
2,958
occurrences

Arachnids
1,869
occurrences

Flowering plants
15,424
occurrences

Ferns
3,367
occurrences

Gymnosperms
28
occurrences

Mosses
2,124
occurrences

Sac fungi
78
occurrences

Basidiomycota
10
occurrences

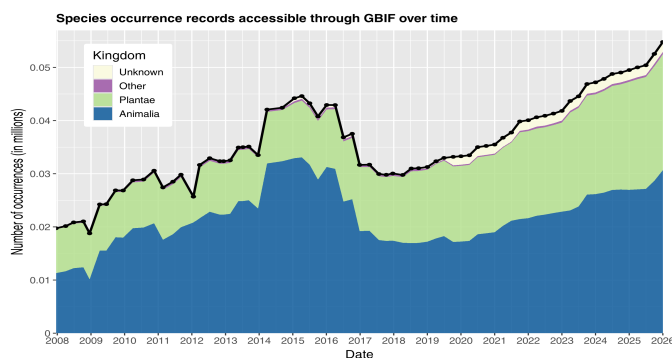

Mammals = Class *Mammalia*
Birds = Class *Aves*
Bony fish = Superclass
Osteichthyes p.p.
Amphibians = Class *Amphibia*

Insects = Class *Insecta*
Reptiles = Class *Testudines*,
Sphenodontia, *Squamata* &
Crocodylia
Molluscs = Phylum *Mollusca*

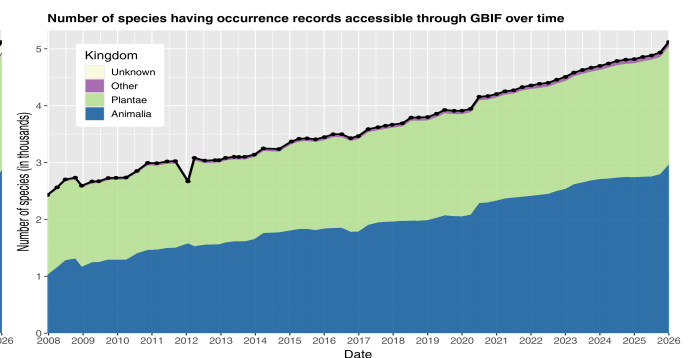

Arachnids = Class *Arachnida*
Flowering plants = Phylum
Magnoliophyta
Gymnosperms = Superclass
Gymnospermae

Ferns = Phylum *Pteridophyta*
Mosses = Phylum *Bryophyta*
Sac fungi = Phylum *Ascomycota*
Basidiomycota = Phylum
Basidiomycota

Change over time in records about biodiversity in Comoros

Occurrence records available about species occurring in Comoros

Species for which at least one occurrence record is available in Comoros

WHY MIGHT THE AMOUNT OF MOBILIZED DATA DECREASE?

Datasets are sometimes removed by publishers, but more often decreases in the number of records are due to the removal of duplicate records and datasets.

SPECIES COUNTS represent the number of binomial scientific names for which GBIF has received data records, organized as far as possible using synonyms recorded in key databases like the Catalogue of Life

Newest publishers from Comoros

No data available

Occurrence records downloaded from GBIF.org, published by institutions in Comoros

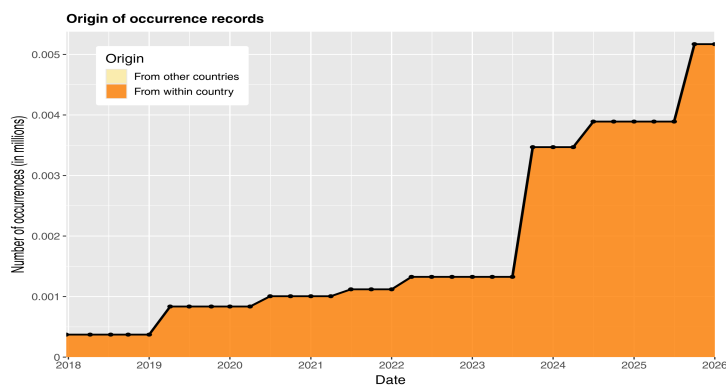

See all publishers from this country or area
gbif.org/publisher/search?country=KM

Number of occurrence records downloaded via GBIF.org published by institutions in Comoros

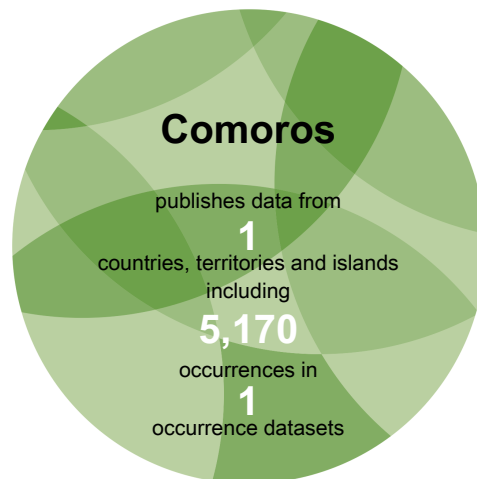

Data mobilization

Data sharing with country or area of origin by national institutions in Comoros

Data sharing with country or area of origin

The chart above shows the number of records shared over time by publishers within Comoros, with separate colours for records about species occurring within undefined and those occurring elsewhere.

Top data contributors about biodiversity in Comoros

Rank	Country or area	No. of occurrences
1	United States of America	16,643
2	France	12,232
3	Belgium	5,557
4	Comoros	5,170
5	United Kingdom	3,898
6	Canada	2,388
7	South Africa	2,188
8	International organization or unknown country	1,592
9	Netherlands	885
10	Germany	663

Table 1. Ranking of countries or areas contributing data about Comoros

Top datasets contributing data about Comoros

The vascular plants collection (P) at the Herbarium of the Muséum national d'Histoire Naturelle (MNHN - Paris). *7,314 occurrences in Comoros.* (Last updated 23 Jul 2025)

EOD – eBird Observation Dataset. *5,170 occurrences in Comoros.* (Last updated 29 Oct 2025)

AntWeb. *3,183 occurrences in Comoros.* (Last updated 29 Dec 2025)

Tropicos Specimens Non-MO. *2,847 occurrences in Comoros.* (Last updated 31 Dec 2025)

Royal Ontario Museum - Ichthyology. *2,244 occurrences in Comoros.* (Last updated 10 Jul 2025)
