

generated January 2026

Saint Lucia

This report provides a series of summary charts, statistics and other details about the mobilization and use of open-access species data through the GBIF network, relating to users and participating institutions in Saint Lucia. These metrics show status at the time of report generation, unless otherwise noted. Taken together, the elements of this report can help guide and measure progress toward the information needs for biodiversity research, as well as for national commitments on biodiversity and sustainable development.

► Access and usage

► Data availability in Saint Lucia

► Data mobilization

Number of records published by institutions in Saint Lucia, categorized by kingdom

Access and usage

Data downloads on GBIF.org from users in Saint Lucia

Monthly downloads requested by users in Saint Lucia

Data availability

Total data available for selected taxonomic groups in Saint Lucia

Mammals = Class *Mammalia*
Birds = Class *Aves*
Bony fish = Superclass
Osteichthyes p.p.
Amphibians = Class *Amphibia*

Insects = Class *Insecta*
Reptiles = Class *Testudines*,
Sphenodontia, *Squamata* &
Crocodylia
Molluscs = Phylum *Mollusca*

Arachnids = Class *Arachnida*
Flowering plants = Phylum
Magnoliophyta
Gymnosperms = Superclass
Gymnospermae

Ferns = Phylum *Pteridophyta*
Mosses = Phylum *Bryophyta*
Sac fungi = Phylum *Ascomycota*
Basidiomycota = Phylum
Basidiomycota

Change over time in records about biodiversity in Saint Lucia

WHY MIGHT THE AMOUNT OF MOBILIZED DATA DECREASE?

Datasets are sometimes removed by publishers, but more often decreases in the number of records are due to the removal of duplicate records and datasets.

SPECIES COUNTS represent the number of binomial scientific names for which GBIF has received data records, organized as far as possible using synonyms recorded in key databases like the Catalogue of Life

Newest publishers from Saint Lucia

No data available

Occurrence records downloaded from GBIF.org, published by institutions in Saint Lucia

See all publishers from this country or area
gbif.org/publisher/search?country=LC

Number of occurrence records downloaded via GBIF.org published by institutions in Saint Lucia

Data mobilization

Data sharing with country or area of origin by national institutions in Saint Lucia

Data sharing with country or area of origin

The chart above shows the number of records shared over time by publishers within Saint Lucia, with separate colours for records about species occurring within undefined and those occurring elsewhere.

Top data contributors about biodiversity in Saint Lucia

Rank	Country or area	No. of occurrences
1	Saint Lucia	96,546
2	United States of America	20,372
3	Canada	2,291
4	United Kingdom	2,222
5	Netherlands	816
6	Switzerland	768
7	France	578
8	Germany	339
9	International organization or unknown country	273
10	Austria	194

Table 1. Ranking of countries or areas contributing data about Saint Lucia

Top datasets contributing data about Saint Lucia

- EOD – eBird Observation Dataset. 96,546 occurrences in Saint Lucia. (Last updated 29 Oct 2025)
- iNaturalist Research-grade Observations. 7,475 occurrences in Saint Lucia. (Last updated 31 Dec 2025)
- NMNH Extant Specimen Records (USNM, US). 3,332 occurrences in Saint Lucia. (Last updated 2 Jan 2026)
- Museum of Comparative Zoology, Harvard University. 2,594 occurrences in Saint Lucia. (Last updated 30 Dec 2025)
- Michigan State University Herbarium Lichens. 791 occurrences in Saint Lucia. (Last updated 1 Dec 2020)
