Liberia

This report provides a series of summary charts, statistics and other details about the mobilization and use of open-access species data through the GBIF network, relating to users and participating institutions in Liberia. These metrics show status at the time of report generation, unless otherwise noted. Taken together, the elements of this report can help guide and measure progress toward the information needs for biodiversity research, as well as for national commitments on biodiversity and sustainable development.

Recent peer-reviewed articles using GBIF-mediated data by co-authors based in Liberia

The GBIF Secretariat maintains and reports on an ongoing literature tracking programme, giving priority to substantive uses of GBIF-mediated data in peer-reviewed literature while identifying the countries or areas of the authors' institutional affiliations. The citations below represent the five most recent journal articles with at least one co-author from Liberia.

Those interested in assisting the Secretariat in identifying additional peer-reviewed uses of GBIF-mediated data may forward relevant citations to comms@gbif.org.

Hordijk, Bialic-Murphy, Lauber *et al.* (2024) Dominance and rarity in tree communities across the globe: Patterns, predictors and threats. *Global Ecology and Biogeography*.
<https://doi.org/10.1111/geb.13889>

Flanders, Frick, Nziza *et al.* (2022) Rediscovery of the critically endangered Hill's horseshoe bat (*Rhinolophus hilli*) and other new records of bat species in Rwanda. *Biodiversity Data Journal*.

Data availability

Total data available for selected taxonomic groups in Liberia

Mammals
11,885
occurrences

Birds
53,065
occurrences

Bony fish
21,796
occurrences

Amphibians
9,821
occurrences

Insects
18,966
occurrences

Reptiles
2,945
occurrences

Molluscs
3,660
occurrences

Arachnids
1,733
occurrences

Flowering plants
93,737
occurrences

Ferns
3,875
occurrences

Gymnosperms
2
occurrences

Mosses
298
occurrences

Sac fungi
434
occurrences

Basidiomycota
449
occurrences

Mammals = Class *Mammalia*
Birds = Class *Aves*
Bony fish = Superclass
Osteichthyes p.p.
Amphibians = Class *Amphibia*

Insects = Class *Insecta*
Reptiles = Class *Testudines*,
Sphenodontia, *Squamata* &
Crocodylia
Molluscs = Phylum *Mollusca*

Arachnids = Class *Arachnida*
Flowering plants = Phylum
Magnoliophyta
Gymnosperms = Superclass
Gymnospermae

Ferns = Phylum *Pteridophyta*
Mosses = Phylum *Bryophyta*
Sac fungi = Phylum *Ascomycota*
Basidiomycota = Phylum
Basidiomycota

Change over time in records about biodiversity in Liberia

Occurrence records available about species occurring in Liberia

Species for which at least one occurrence record is available in Liberia

WHY MIGHT THE AMOUNT OF MOBILIZED DATA DECREASE?

Datasets are sometimes removed by publishers, but more often decreases in the number of records are due to the removal of duplicate records and datasets.

SPECIES COUNTS represent the number of binomial scientific names for which GBIF has received data records, organized as far as possible using synonyms recorded in key databases like the Catalogue of Life

GBIF.org published by institutions in Liberia

Data mobilization

Data sharing with country or area of origin by national institutions in Liberia

Data sharing with country or area of origin

The chart above shows the number of records shared over time by publishers within Liberia, with separate colours for records about species occurring within undefined and those occurring elsewhere.

Top data contributors about biodiversity in Liberia

Rank	Country or area	No. of occurrences
1	United States of America	56,019
2	Liberia	46,579
3	United Kingdom	36,898
4	Netherlands	29,607
5	Sweden	28,416
6	Belgium	13,376
7	France	10,187
8	International organization or unknown country	6,667
9	South Africa	6,123
10	Colombia	5,422

Table 1. Ranking of countries or areas contributing data about Liberia

Top datasets contributing data about Liberia

EOD – eBird Observation Dataset. 38,248 occurrences in Liberia. (Last updated 29 Oct 2025)

FishBase Database. 24,162 occurrences in Liberia. (Last updated 23 Mar 2023)

Naturalis Biodiversity Center (NL) - Botany. 21,926 occurrences in Liberia. (Last updated 23 Oct 2025)

Comparative 16S analysis of hydrothermal vent samples from the Mid-Atlantic Ridge (MAR). 12,636 occurrences in Liberia. (Last updated 24 Sep 2025)

Royal Botanic Gardens, Kew - Herbarium Specimens. 12,601 occurrences in Liberia. (Last updated 2 Jan 2026)

Liberia participates in the following projects coordinated by GBIF

Building Capacity for Biodiversity Data Mobilization and Conservation in Liberia

BID: Biodiversity Information for Development, 2017–2019

This project will enhance national capacity for biodiversity data mobilization, processing, management and publishing; provide high-quality occurrence and distribution data for fauna and flora species of global conservation concern occurring in Liberia; and comprehensive checklists of key fauna and flora species of global conservation concern occurring in the country, data sources, and users.

Enhancing capacity to mobilize and use biodiversity data to support sustainable development in West Africa

Capacity Enhancement Support Programme, 2020–2023

The overall goal of this project is to enhance capacity for biodiversity data mobilization and development of information products in support of sustainable development in West Africa
