

generated January 2026

Marshall Islands

This report provides a series of summary charts, statistics and other details about the mobilization and use of open-access species data through the GBIF network, relating to users and participating institutions in Marshall Islands. These metrics show status at the time of report generation, unless otherwise noted. Taken together, the elements of this report can help guide and measure progress toward the information needs for biodiversity research, as well as for national commitments on biodiversity and sustainable development.

► Access and usage

► Data availability in Marshall Islands

► Data mobilization

Number of records published by institutions in Marshall Islands, categorized by kingdom

Access and usage

Data downloads on GBIF.org from users in Marshall Islands

Monthly downloads requested by users in Marshall Islands

Data availability

Total data available for selected taxonomic groups in Marshall Islands

Mammals
536
occurrences

Birds
5,697
occurrences

Bony fish
44,347
occurrences

Amphibians
19
occurrences

Insects
1,085
occurrences

Reptiles
1,511
occurrences

Molluscs
36,140
occurrences

Arachnids
136
occurrences

Flowering plants
8,547
occurrences

Ferns
286
occurrences

Gymnosperms
14
occurrences

Mosses
252
occurrences

Sac fungi
296
occurrences

Basidiomycota
214
occurrences

Mammals = Class *Mammalia*
Birds = Class *Aves*
Bony fish = Superclass
Osteichthyes p.p.
Amphibians = Class *Amphibia*

Insects = Class *Insecta*
Reptiles = Class *Testudines*,
Sphenodontia, *Squamata* &
Crocodylia
Molluscs = Phylum *Mollusca*

Arachnids = Class *Arachnida*
Flowering plants = Phylum
Magnoliophyta
Gymnosperms = Superclass
Gymnospermae

Ferns = Phylum *Pteridophyta*
Mosses = Phylum *Bryophyta*
Sac fungi = Phylum *Ascomycota*
Basidiomycota = Phylum
Basidiomycota

Change over time in records about biodiversity in Marshall Islands

Occurrence records available about species occurring in Marshall Islands

Species for which at least one occurrence record is available in Marshall Islands

WHY MIGHT THE AMOUNT OF MOBILIZED DATA DECREASE?

Datasets are sometimes removed by publishers, but more often decreases in the number of records are due to the removal of duplicate records and datasets.

SPECIES COUNTS represent the number of binomial scientific names for which GBIF has received data records, organized as far as possible using synonyms recorded in key databases like the Catalogue of Life

Newest publishers from Marshall Islands

No data available

Occurrence records downloaded from GBIF.org, published by institutions in Marshall Islands

See all publishers from this country or area
gbif.org/publisher/search?country=MH

Number of occurrence records downloaded via GBIF.org published by institutions in Marshall Islands

Data mobilization

Data sharing with country or area of origin by national institutions in Marshall Islands

Data sharing with country or area of origin

The chart above shows the number of records shared over time by publishers within Marshall Islands, with separate colours for records about species occurring within undefined and those occurring elsewhere.

Top data contributors about biodiversity in Marshall Islands

Rank	Country or area	No. of occurrences
1	United States of America	113,929
2	Germany	35,214
3	Belgium	10,552
4	New Zealand	7,786
5	New Caledonia	6,179
6	Marshall Islands	4,283
7	Australia	3,752
8	Netherlands	1,603
9	Japan	1,259
10	Sweden	1,138

Table 1. Ranking of countries or areas contributing data about Marshall Islands

Top datasets contributing data about Marshall Islands

NMNH Extant Specimen Records (USNM, US). 33,708 occurrences in Marshall Islands. (Last updated 2 Jan 2026)

iNaturalist Research-grade Observations. 15,833 occurrences in Marshall Islands. (Last updated 31 Dec 2025)

NOAA coral reef monitoring fish data from sites across Micronesia from 2009-09-29 to 2015-09-25. 12,113 occurrences in Marshall Islands. (Last updated 16 Jun 2020)

Neptune Deep-Sea Microfossil Occurrence Database. 12,112 occurrences in Marshall Islands. (Last updated 18 Aug 2016)

NOAA coral reef monitoring benthic data from sites across Micronesia from 2009-09-29 to 2015-09-25. 10,736 occurrences in Marshall Islands. (Last updated 16 Jun 2020)
