

generated January 2026

Martinique

This report provides a series of summary charts, statistics and other details about the mobilization and use of open-access species data through the GBIF network, relating to users and participating institutions in Martinique. These metrics show status at the time of report generation, unless otherwise noted. Taken together, the elements of this report can help guide and measure progress toward the information needs for biodiversity research, as well as for national commitments on biodiversity and sustainable development.

► Access and usage

► Data availability in Martinique

► Data mobilization

Number of records published by institutions in Martinique, categorized by kingdom

Access and usage

Data downloads on GBIF.org from users in Martinique

Data availability

Total data available for selected taxonomic groups in Martinique

Mammals = Class *Mammalia*
Birds = Class *Aves*
Bony fish = Superclass
Osteichthyes p.p.
Amphibians = Class *Amphibia*

Insects = Class *Insecta*
Reptiles = Class *Testudines*,
Sphenodontia, *Squamata* &
Crocodylia
Molluscs = Phylum *Mollusca*

Arachnids = Class *Arachnida*
Flowering plants = Phylum
Magnoliophyta
Gymnosperms = Superclass
Gymnospermae

Ferns = Phylum *Pteridophyta*
Mosses = Phylum *Bryophyta*
Sac fungi = Phylum *Ascomycota*
Basidiomycota = Phylum
Basidiomycota

Change over time in records about biodiversity in Martinique

WHY MIGHT THE AMOUNT OF MOBILIZED DATA DECREASE?

Datasets are sometimes removed by publishers, but more often decreases in the number of records are due to the removal of duplicate records and datasets.

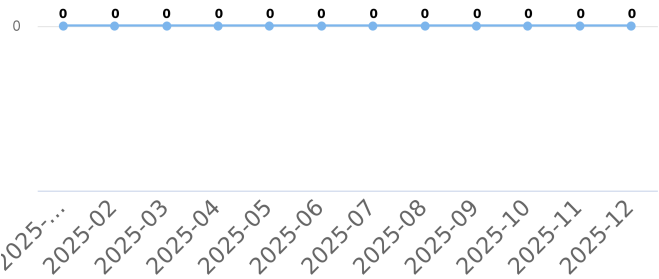

SPECIES COUNTS represent the number of binomial scientific names for which GBIF has received data records, organized as far as possible using synonyms recorded in key databases like the Catalogue of Life

Newest publishers from Martinique

No data available

Occurrence records downloaded from GBIF.org, published by institutions in Martinique

See all publishers from this country or area
gbif.org/publisher/search?country=MQ

Number of occurrence records downloaded via GBIF.org published by institutions in Martinique

Data mobilization

Data sharing with country or area of origin by national institutions in Martinique

Data sharing with country or area of origin

The chart above shows the number of records shared over time by publishers within Martinique, with separate colours for records about species occurring within undefined and those occurring elsewhere.

Top data contributors about biodiversity in Martinique

Rank	Country or area	No. of occurrences
1	France	140,686
2	Belgium	70,588
3	United States of America	49,373
4	Martinique	39,032
5	Germany	9,718
6	United Kingdom	5,195
7	Netherlands	3,037
8	International organization or unknown country	2,581
9	Brazil	934
10	Switzerland	907

Table 1. Ranking of countries or areas contributing data about Martinique

Top datasets contributing data about Martinique

EOD – eBird Observation Dataset. 39,032 occurrences in Martinique. (Last updated 29 Oct 2025)

Macrophytes occurrence data within French Mediterranean Lagoon since 2006. 32,862 occurrences in Martinique. (Last updated 10 Dec 2025)

Dataset of French Observation and Monitoring program for Phytoplankton and Hydrology in coastal waters since 1987. 32,531 occurrences in Martinique. (Last updated 10 Dec 2025)

iNaturalist Research-grade Observations. 24,875 occurrences in Martinique. (Last updated 31 Dec 2025)

Inventaire entomologique standardisé des ZNIEFF et autres sites naturels de Martinique-Inventaire entomologique standardisé des ZNIEFF de Martinique, protocole utilisé à partir de 2016. 10,382 occurrences in Martinique. (Last updated 20 Mar 2024)
