

generated January 2026

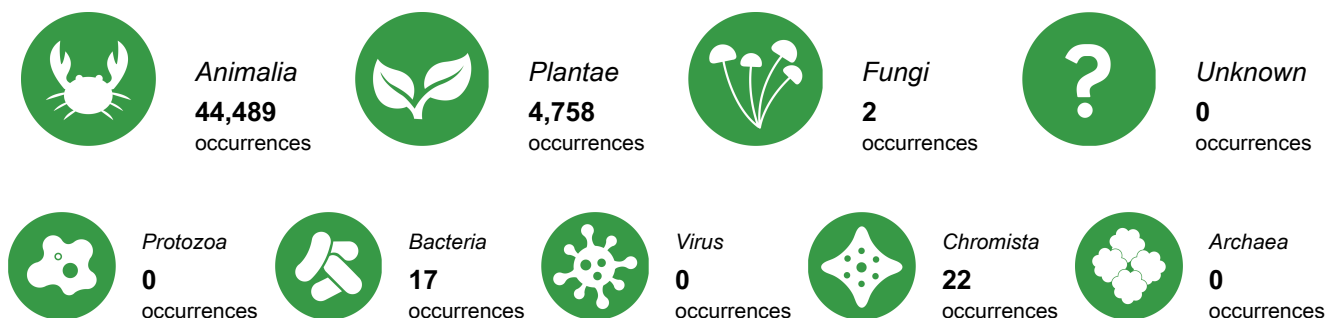

Sint Maarten (Dutch part)

This report provides a series of summary charts, statistics and other details about the mobilization and use of open-access species data through the GBIF network, relating to users and participating institutions in Sint Maarten (Dutch part). These metrics show status at the time of report generation, unless otherwise noted. Taken together, the elements of this report can help guide and measure progress toward the information needs for biodiversity research, as well as for national commitments on biodiversity and sustainable development.

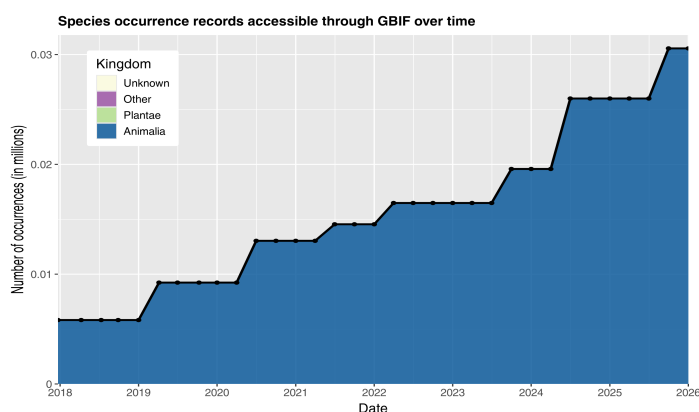

► Access and usage

► Data availability in Sint Maarten (Dutch part)

► Data mobilization

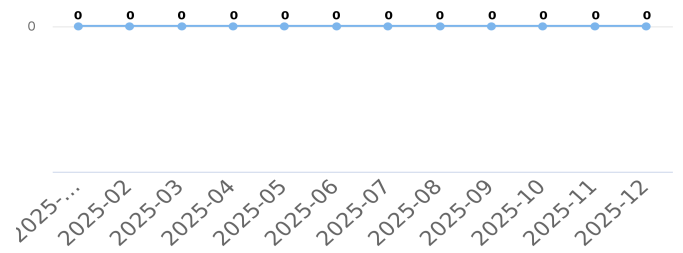

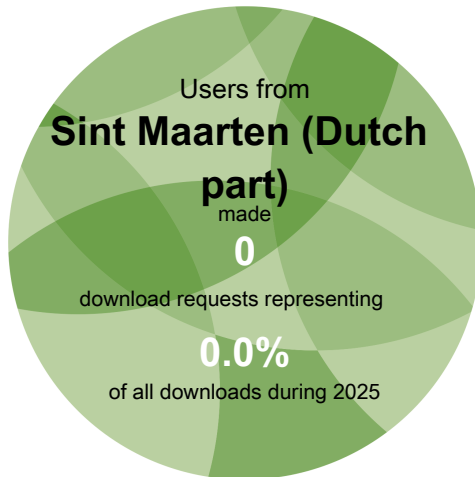

Number of records published by institutions in Sint Maarten (Dutch part), categorized by kingdom

Access and usage

Data downloads on GBIF.org from users in Sint Maarten (Dutch part)

Monthly downloads requested by users in Sint Maarten (Dutch part)

Data availability

Total data available for selected taxonomic groups in Sint Maarten (Dutch part)

Mammals
55
occurrences

Birds
39,495
occurrences

Bony fish
1,376
occurrences

Amphibians
47
occurrences

Insects
1,102
occurrences

Reptiles
578
occurrences

Molluscs
649
occurrences

Arachnids
147
occurrences

Flowering plants
4,656
occurrences

Ferns
33
occurrences

Gymnosperms
0
occurrences

Mosses
7
occurrences

Sac fungi
0
occurrences

Basidiomycota
2
occurrences

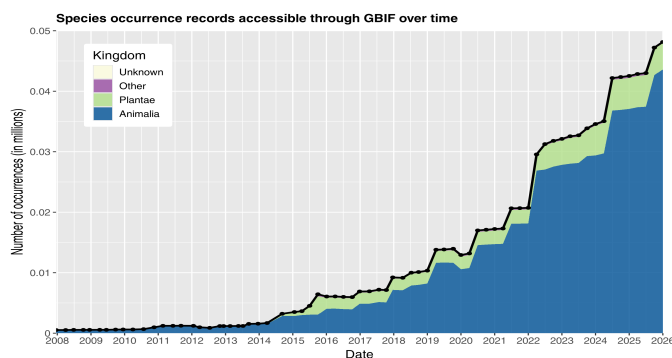

Mammals = Class *Mammalia*
Birds = Class *Aves*
Bony fish = Superclass
Osteichthyes p.p.
Amphibians = Class *Amphibia*

Insects = Class *Insecta*
Reptiles = Class *Testudines*,
Sphenodontia, *Squamata* &
Crocodylia
Molluscs = Phylum *Mollusca*

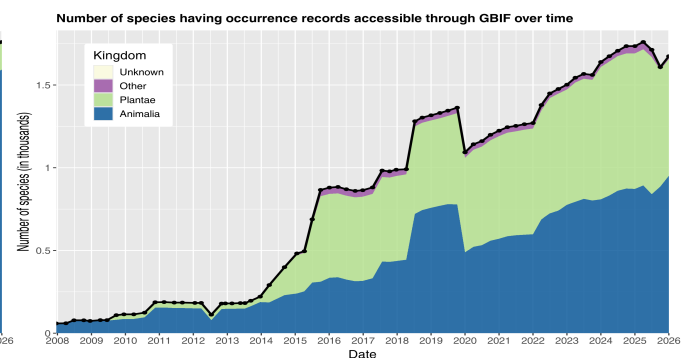

Arachnids = Class *Arachnida*
Flowering plants = Phylum
Magnoliophyta
Gymnosperms = Superclass
Gymnospermae

Ferns = Phylum *Pteridophyta*
Mosses = Phylum *Bryophyta*
Sac fungi = Phylum *Ascomycota*
Basidiomycota = Phylum
Basidiomycota

Change over time in records about biodiversity in Sint Maarten (Dutch part)

Occurrence records available about species occurring in Sint Maarten (Dutch part)

Species for which at least one occurrence record is available in Sint Maarten (Dutch part)

WHY MIGHT THE AMOUNT OF MOBILIZED DATA DECREASE?

Datasets are sometimes removed by publishers, but more often decreases in the number of records are due to the removal of duplicate records and datasets.

SPECIES COUNTS represent the number of binomial scientific names for which GBIF has received data records, organized as far as possible using synonyms recorded in key databases like the Catalogue of Life

Newest publishers from Sint Maarten
(Dutch part)

No data available

Occurrence records downloaded from

(Dutch part)

Data mobilization

Data sharing with country or area of origin by national institutions in Sint Maarten (Dutch part)

Data sharing with country or area of origin

The chart above shows the number of records shared over time by publishers within Sint Maarten (Dutch part), with separate colours for records about species occurring within undefined and those occurring elsewhere.

Top data contributors about biodiversity in Sint Maarten (Dutch part)

Rank	Country or area	No. of occurrences
1	Sint Maarten (Dutch part)	30,561
2	Netherlands	11,021
3	United States of America	6,678
4	France	391
5	Venezuela	225
6	United Kingdom	132
7	International organization or unknown country	111
8	Canada	87
9	Germany	54
10	Mexico	13

Table 1. Ranking of countries or areas contributing data about Sint Maarten (Dutch part)

Top datasets contributing data about Sint Maarten (Dutch part)

EOD – eBird Observation Dataset. *30,561 occurrences in Sint Maarten (Dutch part)*. (Last updated 29 Oct 2025)

Observation.org, Nature data from around the World. *7,094 occurrences in Sint Maarten (Dutch part)*. (Last updated 16 Dec 2025)

iNaturalist Research-grade Observations. *4,503 occurrences in Sint Maarten (Dutch part)*. (Last updated 31 Dec 2025)

Flora of the Dutch Caribbean Islands. *1,822 occurrences in Sint Maarten (Dutch part)*. (Last updated 26 May 2022)

University of Liverpool seabird tracking in Anguilla 2012-2015. *1,809 occurrences in Sint Maarten (Dutch part)*. (Last updated 16 Dec 2025)
