

generated January 2026

Tajikistan

This report provides a series of summary charts, statistics and other details about the mobilization and use of open-access species data through the GBIF network, relating to users and participating institutions in Tajikistan. These metrics show status at the time of report generation, unless otherwise noted. Taken together, the elements of this report can help guide and measure progress toward the information needs for biodiversity research, as well as for national commitments on biodiversity and sustainable development.

► Access and usage

► Data availability in Tajikistan

► Data mobilization

Number of records published by institutions in
Tajikistan, categorized by kingdom

Access and usage

Data downloads on GBIF.org from users in Tajikistan

Recent peer-reviewed articles using GBIF-mediated data by co-authors based in Tajikistan

The GBIF Secretariat maintains and reports on an ongoing literature tracking programme, giving priority to substantive uses of GBIF-mediated data in peer-reviewed literature while identifying the countries or areas of the authors' institutional affiliations. The citations below represent the five most recent journal articles with at least one co-author from Tajikistan.

Those interested in assisting the Secretariat in identifying additional peer-reviewed uses of GBIF-mediated data may forward relevant citations to comms@gbif.org.

Zhuo, Wang, Koirala *et al.* (2025) Considering plant-ungulate interaction contribute to maximizing conservation efficiency under climate change. *Global Ecology and Conservation*.
<https://doi.org/10.1016/j.gecco.2025.e03536>

Reshetnikov, Zibrova, Ayaz *et al.* (2023) □ Rarely naturalized, but widespread and even invasive: the paradox of a popular pet terrapin expansion in Eurasia. *NeoBiota*.
<https://doi.org/10.3897/neobiota.81.90473>

Akhrorov, Cai, Song *et al.* (2022) Ecological constraints on elevational gradients of bird species richness in Tajikistan. *Avian Research*.
<https://doi.org/10.1016/j.avrs.2022.100026>

Data availability

Total data available for selected taxonomic groups in Tajikistan

Mammals
693
occurrences

Birds
55,995
occurrences

Bony fish
354
occurrences

Amphibians
378
occurrences

Insects
18,764
occurrences

Reptiles
1,486
occurrences

Molluscs
1,075
occurrences

Arachnids
361
occurrences

Flowering plants
58,759
occurrences

Ferns
712
occurrences

Gymnosperms
1,006
occurrences

Mosses
143
occurrences

Sac fungi
1,148
occurrences

Basidiomycota
901
occurrences

Mammals = Class *Mammalia*
Birds = Class *Aves*
Bony fish = Superclass
Osteichthyes p.p.
Amphibians = Class *Amphibia*

Insects = Class *Insecta*
Reptiles = Class *Testudines*,
Sphenodontia, *Squamata* &
Crocodylia
Molluscs = Phylum *Mollusca*

Arachnids = Class *Arachnida*
Flowering plants = Phylum
Magnoliophyta
Gymnosperms = Superclass
Gymnospermae

Ferns = Phylum *Pteridophyta*
Mosses = Phylum *Bryophyta*
Sac fungi = Phylum *Ascomycota*
Basidiomycota = Phylum
Basidiomycota

Change over time in records about biodiversity in Tajikistan

Occurrence records available about species occurring in Tajikistan

Species for which at least one occurrence record is available in Tajikistan

WHY MIGHT THE AMOUNT OF MOBILIZED DATA DECREASE?

Datasets are sometimes removed by publishers, but more often decreases in the number of records are due to the removal of duplicate records and datasets.

SPECIES COUNTS represent the number of binomial scientific names for which GBIF has received data records, organized as far as possible using synonyms recorded in key databases like the Catalogue of Life

Most recent datasets from publishers in Tajikistan

Khatlon Scientific Center. *Published by Khatlon Scientific Center of the National Academy of Sciences of Tajikistan*

<https://doi.org/10.15468/q2y8b2>

The Herbarium Fund of the Institute of Botany, Plant Physiology and Genetics at the Tajikistan National Academy of Sciences - non-BRAHMS records. *Published by Institute of Botany, Plant Physiology and Genetics, National Academy of Sciences of Tajikistan*

<https://doi.org/10.15468/9xjs98>

The Herbarium of Tajik National University. *Published by Tajik National University*

<https://doi.org/10.15468/qwfnw9>

The Herbarium Fund of the Institute of Botany, Plant Physiology and Genetics at the Tajikistan National Academy of Sciences - BRAHMS records. *Published by Institute of Botany, Plant Physiology and Genetics, National Academy of Sciences of Tajikistan*

<https://doi.org/10.15468/ntdjg9>

Data mobilization

Data sharing with country or area of origin by national institutions in Tajikistan

Data sharing with country or area of origin

The chart above shows the number of records shared over time by publishers within Tajikistan, with separate colours for records about species occurring within undefined and those occurring elsewhere.

Top data contributors about biodiversity in Tajikistan

Rank	Country or area	No. of occurrences
1	Tajikistan	60,495
2	Russian Federation	15,236
3	United States of America	13,384
4	Poland	9,783
5	Estonia	9,652
6	Colombia	6,820
7	International organization or unknown country	5,961
8	Sweden	5,112
9	Switzerland	4,842
10	United Kingdom	3,369

Table 1. Ranking of countries or areas contributing data about Tajikistan

Top datasets contributing data about Tajikistan

EOD – eBird Observation Dataset. 51,319 occurrences in Tajikistan. (Last updated 29 Oct 2025)

Moscow University Herbarium (MW). 10,564 occurrences in Tajikistan. (Last updated 1 Jan 2026)

The Herbarium Fund of the Institute of Botany, Plant Physiology and Genetics at the Tajikistan National Academy of Sciences - BRAHMS records. 8,785 occurrences in Tajikistan. (Last updated 30 Dec 2023)

OPUN - Middle Asia. 7,593 occurrences in Tajikistan. (Last updated 21 May 2024)

A global database for the distributions of crop wild relatives. 6,820 occurrences in Tajikistan. (Last updated 9 Feb 2024)
