

generated January 2026

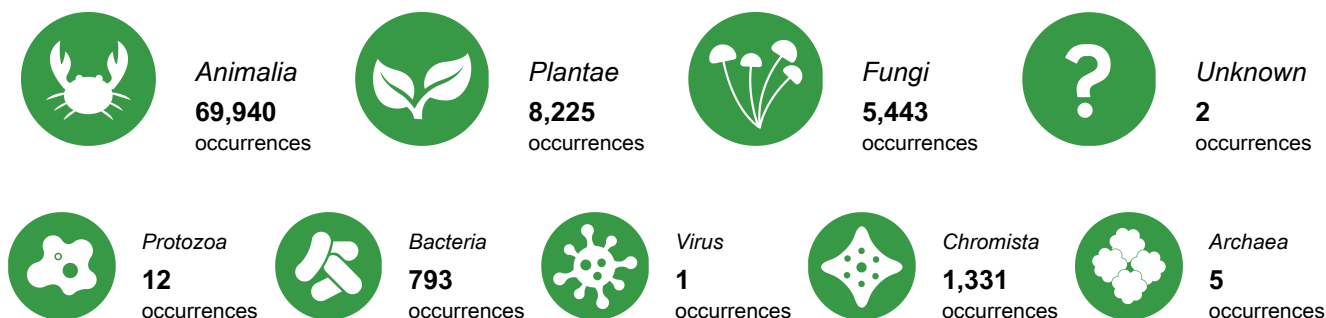

British Virgin Islands

This report provides a series of summary charts, statistics and other details about the mobilization and use of open-access species data through the GBIF network, relating to users and participating institutions in British Virgin Islands. These metrics show status at the time of report generation, unless otherwise noted. Taken together, the elements of this report can help guide and measure progress toward the information needs for biodiversity research, as well as for national commitments on biodiversity and sustainable development.

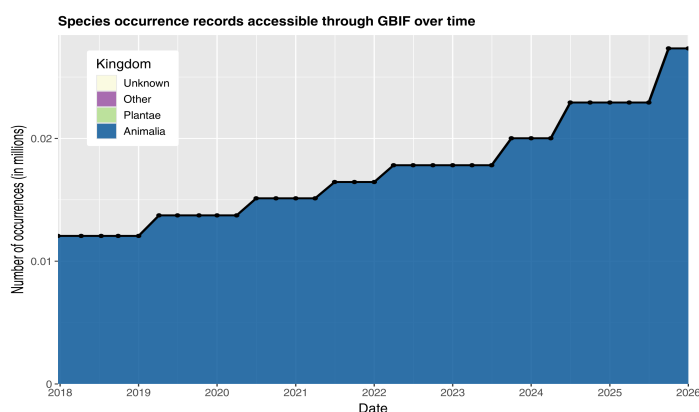

► Access and usage

► Data availability in British Virgin Islands

► Data mobilization

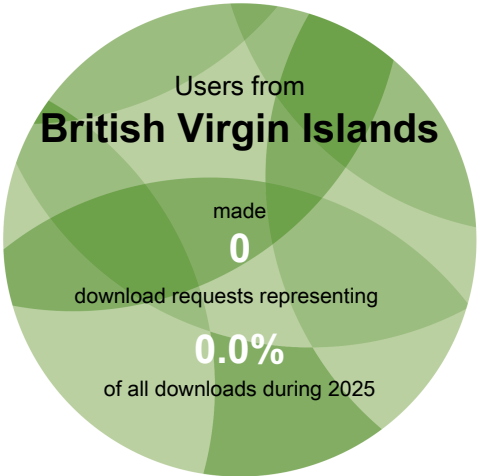

Number of records published by institutions in British Virgin Islands, categorized by kingdom

Access and usage

Data downloads on GBIF.org from users in British Virgin Islands

Monthly downloads requested by users in British Virgin Islands

Data availability

Total data available for selected taxonomic groups in British Virgin Islands

Mammals
276
occurrences

Birds
42,116
occurrences

Bony fish
3,351
occurrences

Amphibians
821
occurrences

Insects
3,353
occurrences

Reptiles
6,008
occurrences

Molluscs
5,635
occurrences

Arachnids
916
occurrences

Flowering plants
7,390
occurrences

Ferns
160
occurrences

Gymnosperms
2
occurrences

Mosses
299
occurrences

Sac fungi
2,882
occurrences

Basidiomycota
1,981
occurrences

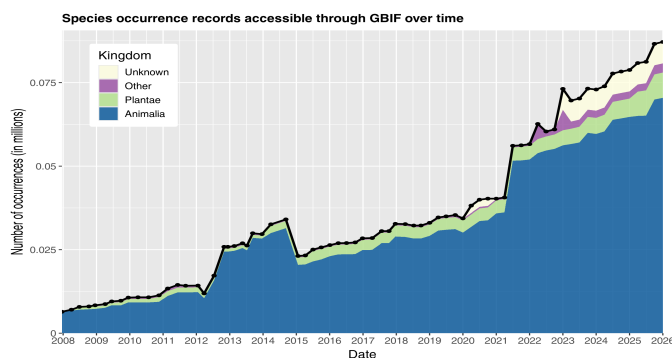

Mammals = Class *Mammalia*
Birds = Class *Aves*
Bony fish = Superclass
Osteichthyes p.p.
Amphibians = Class *Amphibia*

Insects = Class *Insecta*
Reptiles = Class *Testudines*,
Sphenodontia, *Squamata* &
Crocodylia
Molluscs = Phylum *Mollusca*

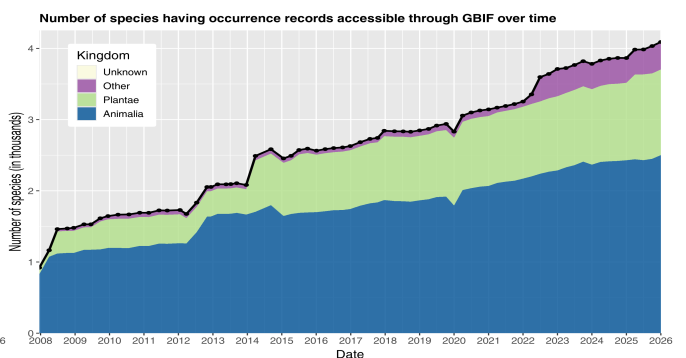

Arachnids = Class *Arachnida*
Flowering plants = Phylum
Magnoliophyta
Gymnosperms = Superclass
Gymnospermae

Ferns = Phylum *Pteridophyta*
Mosses = Phylum *Bryophyta*
Sac fungi = Phylum *Ascomycota*
Basidiomycota = Phylum
Basidiomycota

Change over time in records about biodiversity in British Virgin Islands

Occurrence records available about species occurring in British Virgin Islands

Species for which at least one occurrence record is available in British Virgin Islands

WHY MIGHT THE AMOUNT OF MOBILIZED DATA DECREASE?

Datasets are sometimes removed by publishers, but more often decreases in the number of records are due to the removal of duplicate records and datasets.

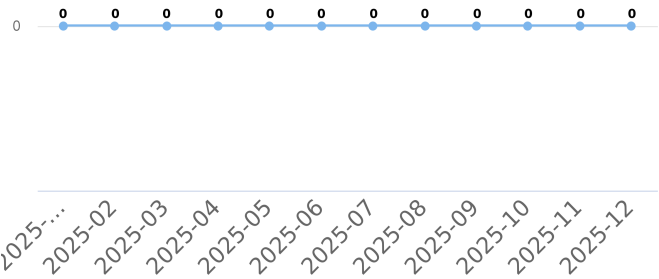

SPECIES COUNTS represent the number of binomial scientific names for which GBIF has received data records, organized as far as possible using synonyms recorded in key databases like the Catalogue of Life

Newest publishers from British Virgin Islands

No data available

Occurrence records downloaded from GBIF.org, published by institutions in British Virgin Islands

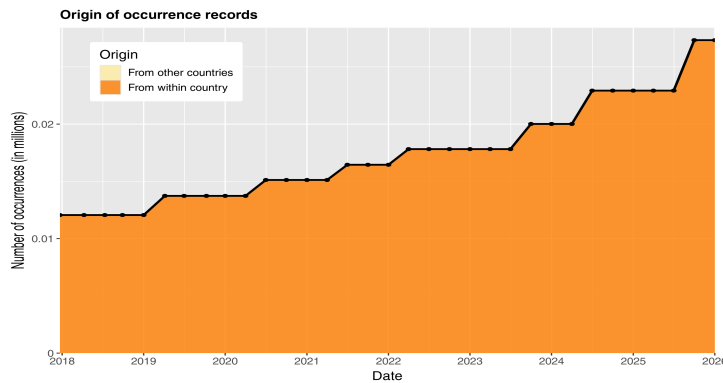

See all publishers from this country or area
gbif.org/publisher/search?country=VG

Number of occurrence records downloaded via GBIF.org published by institutions in British Virgin Islands

Data mobilization

Data sharing with country or area of origin by national institutions in British Virgin Islands

Data sharing with country or area of origin

The chart above shows the number of records shared over time by publishers within British Virgin Islands, with separate colours for records about species occurring within undefined and those occurring elsewhere.

Top data contributors about biodiversity in British Virgin Islands

Rank	Country or area	No. of occurrences
1	United States of America	44,223
2	British Virgin Islands	27,333
3	Estonia	8,452
4	United Kingdom	2,955
5	Venezuela	626
6	International organization or unknown country	481
7	Belgium	386
8	Canada	342
9	France	311
10	Netherlands	263

Top datasets contributing data about British Virgin Islands

EOD – eBird Observation Dataset. 27,333 occurrences in British Virgin Islands. (Last updated 29 Oct 2025)

University of Liverpool seabird tracking in Anguilla 2012-2015. 13,727 occurrences in British Virgin Islands. (Last updated 16 Dec 2025)

Global soil organisms. 7,078 occurrences in British Virgin Islands. (Last updated 27 Feb 2023)

iNaturalist Research-grade Observations. 5,843 occurrences in British Virgin Islands. (Last updated 31 Dec 2025)

NMNH Extant Specimen Records (USNM, US). 5,609 occurrences in British Virgin Islands. (Last updated 2 Jan 2026)
